**Prices include planting locally. Cash and carry
at the nursery 20% discount.**

TERMS—Cash, unless you have established credit with us.

LIABILITY—Orders are accepted subject to stock on hand and unsold, with the understanding that they shall be void should injury befall the stock from flood, drought, fire, frost, or should our operations be impaired by labor shortage or any other condition beyond our control.

GUARANTEE—We will resupply one time, without cost, all plants purchased from us that die by June 1st, following planting. Plants that die the following summer will be resupplied, one time, at one-half price. The above guarantee does not cover planting in June, July and August, which is guaranteed for only 30 days.

All guarantees are predicated on the assurance by the purchaser that the plants have been properly cared for and that the plants have been paid for within 30 days of the date of planting.

Absolutely no claims for full replacements will be considered after June 1st following date of purchase.

HEIGHT AND CALIBER—Height of plants is considered from the ground level to the tip of the plant. (Does not include ball of earth.)

In low growing varieties of plants spread is considered instead of height. Caliber is the method used for measuring larger deciduous trees. Caliber is the diameter of the tree at a point one foot above the ground.

WATERING—We have found that more plants are lost from failure to water properly the first year after moving, than from any other cause.

Do not drown the plants, but do see that they get some water (twice a week) from late May until October.

FERTILIZING—Well rotted manures make fine food for plants. This should always be applied on the surface in a circle around the plant, as a mulch.

Ordinary soil will probably keep your plant healthy and growing. Mulching will greatly aid the plant in its color and vigor, as it also holds moisture around its roots.

CONIFERUS EVERGREENS

In summer, **EVERGREENS** add a cool, comfortable appearance to a home, and, in winter, they are invaluable for the warmth and color that they give to any setting. We are glad to give expert advice to our customers on their use and care.

Arborvitae, American

THUJA OCCIDENTALIS

Erect and pyramidal plant with foliage soft and dark green in color. Excellent for tall hedges. May be kept at any height.

24-30"	\$3.75
30-36"	4.50
36-42"	5.50

Arborvitae, Berckman Golden

THUJA ORIENTALIS AUREA NANA

Are of the best dwarf golden evergreens. Very compact, symmetrical, and attractive in winter.

15-18"	\$3.50
18-24"	4.25
24-30"	5.00
30-36"	6.00
36-42"	7.50

Arborvitae, Chinese

THUJA ORIENTALIS CHINENSIS

A hardy conifer of pyramidal growth. Fresh green foliage in winter. May be kept to any height by trimming.

2-3'	\$3.00
3-4'	4.50

Arborvitae, Globe

THUJA OCCIDENTALIS GLOBOSA

Dwarf globe shaped Arborvitae. Forms dense, low globe. Handsome shade of green. Valuable for formal effects.

12-15"	\$2.50
15-18"	3.50
18-24"	4.50
24-30"	5.50

Arborvitae, Hovey

THUJA OCCIDENTALIS HOVEYI

A dense globose form with upright branches and bright green foliage. A neat small evergreen.

15-18"	\$3.00
18-24"	4.00
24-30"	5.00

CONIFEROUS EVERGREENS (Continued)**Arborvitae, Plicata****THUJA OCCIDENTALIS PLICATA**

A compact form good for foundation planting. Foliage is dark green, flat and shiny.

18-24"	\$3.00
24-30"	4.00
30-36"	5.00
3-4'	6.00

Arborvitae, Pyramidal**THUJA OCCIDENTALIS PYRAMIDALIS**

Erect, tall, dark green. Seldom needs shearing. Transplants easily.

2-3'	\$4.00
3-3½'	5.00
3½-4'	6.00
4-5'	7.50
5-6'	9.00

Cedar, Indian**CEDRUS DEODORA**

Stately tree. Blue-green foliage. Feathery, spreading branches. Hardy. Fast growing.

2-3'	\$4.50
3-4'	6.50
4-5'	9.00
5-6'	12.00

Cypress, Golden**CHAMAECYPARIS PISIFERA PLUMOSA AUREA**

Pyramidal shrub with thread-like foliage. Tips of foliage golden.

18-24"	\$3.25
24-30"	3.75
30-36"	4.50

Cypress, Lutea**C. PISIFERA LUTESCENS**

Dwarf, golden yellow variety. Globular in form.

15-18"	\$3.00
18-24"	3.75
24-30"	4.50
30-36"	6.00

CONIFEROUS EVERGREENS (Continued)**Cypress, Silver****CHAMAECYPARIS P. SQUARROSA
VEITCHII**

Soft blue-green foliage. Frondlike branches. Pyramidal.

18-24"	\$3.25
24-30"	3.75
30-36"	4.50
36-42"	5.50

Cypress, Plume**CHAMAECYPARIS PISIFERA PLUMOSA**

Green Pyramidal type. Feathery foliage. Soft green inside foliage. Hardy.

24-30"	\$3.75
30-36"	4.50
3-4'	6.50

Hemlock, Canadian**TSUGA CANADENSIS**

Graceful evergreen with yew-like foliage. Spreading pendulous branches. May be kept small by trimming.

2-3'	\$ 5.00
3-4'	7.50
4-5'	10.00
5-6'	12.50
6-7'	17.50

Juniper, Greek**J. EXCELSA STRICTA**

Grey-green Spiny foliage. Dense, wide pyramid shaped.

12-18"	\$ 3.00
18-24"	4.00
24-30"	5.00
30-36"	6.50
36-42"	8.00

Juniper, Hetzi**J. CHINENSIS PFITZERIANA HETZI**

New strain of pfitzer Juniper. Blue-grey color is different and outstanding.

18-24"	\$ 5.00
24-30"	7.00
30-36"	9.00
36-42"	11.50

CONIFEROUS EVERGREENS (Continued)**Juniper, Irish****JUNIPERUS COMMUNIS HIBERNICA**

Columnar shaped. Blue-green foliage. Rapid growth. Requires small space to grow in. Formal.

2-3'	\$ 3.50
3-4'	4.50
4-5'	5.50

Juniper, Litoralis**J. CONFERTA**

Ground covering type. Light green foliage. Covers large area rapidly.

18-24"	\$ 3.75
2-3'	5.00

Juniper, Pfitzer**J. CHINENSIS PFITZERIANA**

Spreading type. Beautiful silvery green, feathery foliage. Very hardy, and dense.

12-18"	\$ 3.50
18-24"	4.50
24-30"	6.50
30-36"	8.50
36-42"	11.00

Juniper, Pfitzer, Dwarf**J. CHINENSIS PFITZERIANA NANA**

Similar to Pfitzer Juniper. Much slower in growth.

12-18"	\$ 4.00
18-24"	5.00
24-30"	7.00

Juniper, Savin**J. SABINA**

Dark green form spreading outward and upward.

15-18"	\$ 3.00
18-24"	4.00
24-30"	5.00

Juniper, Swedish**J. COMMUNIS SUECICA**

Columnar. Light green foliage. Compact.

18-24"	\$ 3.00
24-30"	4.00
30-36"	5.50

CONIFEROUS EVERGREENS (Continued)**Pine, White****PINUS STROBUS**

Native tree. Easily transplanted. Needles have bluish-green caste. Fast grower. Hardy.

2-3'	\$ 4.00
3-4'	6.50
4-5'	8.50
5-6'	12.50
6-7'	17.50
7-8'	22.50

Spruce, Norway**PICEA EXCELSA**

Symetrical. Spreading somewhat pendulous branches. Foliage dark shiny green.

2-3'	\$ 4.00
3-4'	6.50
4-5'	9.00

Yew, Columnar**TAXUS ERECTA**

Erect dense growing variety. Fine, shiny leaves. Hardy.

12-18"	\$ 4.00
18-24"	5.50
24-30"	8.00
30-36"	11.00
36-42"	14.00

Yew, Hick's**TAXUS MEDIA HICKSI**

Columnar form. Upright branches. Spreading leaves. Red berries. Very hardy.

12-18"	\$ 4.00
18-24"	5.50
24-30"	8.00
30-36"	11.00
36-42"	14.00

Yew, Japanese**TAXUS CUSPIDATA**

Dark green all year. Broad as plant is tall. Disease free.

12-18"	\$ 4.00
18-24"	5.00
24-30"	6.50
30-36"	9.00
36-42"	12.50

BROADLEAF EVERGREENS

Modern Home-Plantings cannot be considered as complete—or hardly begun—if they do not contain a liberal supply of Broadleaf Evergreens. They are needed for the green foliage which gives color all the year, especially in winter when warmth and color are demanded.

Abelia, Glossy

ABELIA GRANDIFLORA

Graceful drooping stems and branches. Dark, glossy leaves. Bell shaped flowers of white, tinted pink, from May to October.

15-18"	\$ 1.50
18-24"	2.00
2-3'	3.00
3-4'	4.50

Aucuba, Gold Dust

AUCUBA JAPONICA VARIEGATA

Large glossy leaves spotted with gold. Thrive in shade.

12-18"	\$ 2.50
18-24"	4.00
24-30"	6.00
30-36"	8.50

Bamboo, Japanese Evergreen

ARUNDINARIA JAPONICA

Grows easily, spreads rapidly. Makes effective screen. 6 to 10 feet tall. Canes make straight poles.

Small Clump	\$2.00
Large Clump	3.50-4.50

Barberry, Julianne Evergreen

BERBERIS JULIANAE

Spiny, glossy green leaves all winter. Yellow flowers in Spring. Hardy. Erect. Compact.

15-18"	\$ 2.50
18-24"	3.50
24-30"	4.50
30-36"	6.50
36-42"	8.00
42-48"	11.00

BROADLEAF EVERGREENS (Continued)**Barberry, Tricanthophora****BERBERIS TRICANTHOPHORA**

Neat compact habit. Leaves white underneath in contrast to green upper foliage. Hardy, Evergreen.

12-15"	\$ 2.25
15-18"	3.00
18-24"	4.00
24-30"	5.50
30-36"	7.00

**BOXWOOD—VIRGINIA GROWN**

Boxwood has long been one of our specialties, as it has been and still is, aside from its sentimental and historic value in association with Virginia, the most practical, durable and beautiful plant that can be used. Its use will add dignity and charm to any home or garden. We have several hundred thousand plants in the various sizes of our own growing besides a quantity of specimen collected plants of both dwarf and bush types.

Boxwood, Bush**BUXUS SEMPERVIRENS**

Small elongated dark green leaves. Compact. Glossy. Thrives in shade.

10-12"	\$ 2.00
12-15"	3.00
15-18"	4.00
18-21"	5.00

Large Clump	2.00

**AZALEAS AND CAMELLIAS**

We offer this large list of Azalea and Camellia plants that will thrive in this area. These plants are acid loving and grow best in sandy soil with plenty of leaf-mold worked in. A heavy mulch of pine tags or peat moss will hold moisture to these shallow-rooted plants in summer, and protect them in winter.

Azalea, Amoena

Mass of bright rosy purple flowers in May. Foliage green with a bronze tint in fall.

10-12" Spread	\$ 2.50
12-15"	3.00

30-36"	8.00
36-42"	10.00
42-48"	12.50

SHADE AND FLOWERING TREES

We are offering a nice lot of shade and ornamental trees this season which consist of only such varieties as possess distinctive decorative merit, suitable for lawn, park, avenue and street planting.

Planting. To insure successful results the ground should be well prepared before planting, enriching, if necessary, with well decayed manure which should be well mixed. The hole should be dug at least two feet wider than the diameter of spread of the roots of the tree planted and about an inch deeper than the nursery soil line indicated on the stem. The roots should be spread out in a natural way, filling in with fine soil, and pouring in several buckets of water to run the soil to the roots. It is advisable to stake trees to prevent wind-shake until they attach themselves to the ground. Also we want to emphasize the necessity of a mulch after planting. This consists of straw (or similar material) placed around the base of the tree about 6 or 8 inches high and a little wider than the width of the hole. Allow this to stay on one year and it will practically insure the tree's life.

Birch, Cutleaf Weeping

BETULA PENDULA GRACILIS

This birch has white bark that peels off in layers. Branches droop. Foliage finely cut.

4-5'	\$ 5.00
5-6'	6.00

SHADE & FLOWERING SHRUBS (Continued)**Birch, White****BETULA PENDULA ALBA**

White bark and spray like branches make this tree most attractive.

4-5'	\$ 4.50
5-6'	5.50
6-8'	7.50

Chinese Chestnut**CASTANEA MOLLISSIMA**

Blight resistant chestnut. Large burrs, in fall, produce three edible nuts each.

4-5'	\$ 5.00
------	---------

Dogwood, Pink Flowering**CORNUS FLORIDA RUBRA**

An enchanting pink form of the native dogwood. A wonderful combination is made by planting the pink and white varieties together.

30-36"	\$ 5.00
3-4'	6.50
4-5'	9.50
5-6'	12.50 and 15.00

Dogwood, White Flowering**CORNUS FLORIDA**

This native Virginia tree produces a wealth of white blossoms in spring. In fall the foliage is very colorful. Brilliant scarlet fruit remain well into the winter.

2-3'	\$ 2.50
3-4'	3.50
4-5'	5.00
5-6'	7.50

8-10'	6.50

Willow, Pussy**SALIX DISCOLOR**

Large colorful spring catkins. Very hardy. Easily grown.

3-4'	\$ 2.00
4-5'	3.00

DECIDUOUS FLOWERING SHRUBS

The planting of hardy shrubs has now become so important that we have provided a full assortment of the most choice and desirable varieties. There is almost an indefinite number of species, from which, after careful trial, we have selected those varieties which we consider the most desirable for general planting.

Pruning Shrubs. Many persons trim and shear shrubs into regular shapes, imagining that regular outline adds to their effect and beauty. While symmetry and regularity of form are to be admired in a shrub this quality should never be gained at the expense of health and natural grace. Each shrub has its own peculiarities of habit and foliage, and we should aim to preserve these characteristics as far as possible. Judicious pruning to secure health and vigor is necessary but trimming all kinds of shrubs into one form shows a lack of appreciation of natural beauty, to say the least. The old growth should be occasionally thinned out and the suckers and root sprouts removed when they appear. The best time, however for pruning all shrubs is when they are done flowering.

We are growers of shrubs in a large way, and have as nice, vigorous plants as can be obtained anywhere. All shrubs are dug fresh from the nursery when shipment is made.

Almond, Pink Flowering

PRUNUS GLANDULOSA FLORA PLENA

In full bloom before leaves appear. Dwarf, bushy, compact.

2-3'	\$ 2.00
3-4'	3.00

Althea, Rose of Sharon

Abundance of bloom from July to September. Wide diversity of color in the varieties. Beautiful screen or hedge.

2-3'	\$ 1.50 each
3-4'	2.00 "
4-5'	2.50 "

Althea Varieties

ARDENS. Double purple-blue
 COMPTE DE HAIMONT. Double Pink
 DUC DE BRABANT. Dark Red
 JEANNE D'ARC. Double White

Wisteria, Purple

WISTERIA SINENSIS

Climbing vine. Fast grower. Grafted to bloom. Large purple flowers.

2 Year Plants	\$ 2.50
3 Year Plants	3.50

FRUIT TREES

APPLES

The varieties offered below are some of the best known and proven sorts. Clay or clay loam is the best soil for growing apples. The land should be plowed well and deep before setting the trees. It should, of course, be well drained and kept thoroughly cultivated.

	Each
4-5 ft. -----	\$2.00
5-7 ft. -----	2.50

Summer Apples

EARLY HARVEST. Medium to large, bright yellow, tender, juicy, well flavored. Ripens early June and lasts 2 to 3 weeks.

YELLOW TRANSPARENT. Medium, yellow, good quality. A productive, excellent and popular variety. Tree of dwarfish habit. Bears young. June.

RED ASTRACHAN. Large; yellow, nearly covered with crimson, and fine bloom; juicy, crisp, acid; a beautiful fruit. Tree a thrifty and fine grower; excellent and profitable. June.

Fall Apples

FALL CHEESE. Large green striped with red, flesh white. Subacid flavor with rich aroma.

SHEEP NOSE. Fruit large at base, tapering to apex; brown russet red; tender and fine. August.

Winter Apples

DELICIOUS. Medium to large; roundish, skin dark red with yellow background. A heavy bearer and good keeper; extra fine.

YELLOW DELICIOUS. A very fine apple, similar to the Delicious in flavor and time of ripening.

MAMMOTH BLACK TWIG. A seedling of Winesap; fruit darker red and larger size; strong, upright grower; fine flavor. One of the best Apples.

FRUIT TREES (Continued)

STAYMAN'S WINESAP. Also a seedling of Winesap; dark red, firm flesh, fine grained, crisp, sub-acid; quality best; strong grower.

WINESAP. The old-fashioned Winesap. No better apple to be had; needs no description.

Crab Apples

HYSLOP CRAB. Large, deep crimson; one of the most beautiful of Crabs; very popular.

PEACHES

A well-drained, sandy loam with a clay sub-soil is an ideal soil for the Peach; however, the Peach has the faculty of adapting itself to almost any soil, provided it is well drained.

3-4'

\$ 1.50 Each

GOLDEN JUBILEE. A high quality, early, yellow, free-stone peach. The value of this peach to the Eastern and Southern grower cannot be estimated. A typical Elberta type fruit, highly colored, ripening before Carman or about four weeks before the regular Elberta.

BELLE OF GEORGIA. Ripens the first to fifteenth of August. Fruit is large, white with red cheek; flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

ELBERTA. Midseason. A valuable large peach, of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

CHERRIES

Sweet Cherries

BLACK TARTARIAN. Late, large, black, tender, juicy. July.

4-6' Trees

\$ 2.50 Each

Sour Cherries

MONTMORENCY. Largest and strongest grower of all sour cherries. Red. June.

4-6' Trees

\$ 2.50 Each

PEARS

4 to 6 ft. trees-----\$2.50 Each

BARTLETT. Large, yellow, most popular. August.

KIEFFER. Large to very large; skin yellow with a light vermilion cheek; flesh brittle; very juicy, good quality. Begins to bear at 3 to 4 years old. One of the surest bearers.

SECKEL. Of delicious, sweet flavor; melting; tree a stout, slow grower. August.

FRUIT TREES (Continued)

PLUMS

4 to 6 ft.-----\$2.50 Each

ABUNDANCE—Botan. One of the oldest and best known Japanese varieties; hardy, productive. Fruit large, lemon yellow, with heavy bloom; good quality. July.

FIGS

ITALIAN. Large, sweet, firm fruit. Hardy. Fruit from July to frost.

CELESTIAL. Smaller fruit, very sweet. Hardy.

2-3'	\$ 2.50
3-4'	3.50
4-5' Italian only	5.00

GRAFTED PECANS

Where soil and climatic conditions are proper, it has been practically demonstrated that Pecan-growing is a paying investment; but only grafted or budded trees of well-known and meritorious varieties should be planted. We are only offering the Stuart, which seems to be best suited to this section.

3 to 4 ft. trees	-----\$4.00
4 to 5 ft. trees	----- 6.00

STUART. Nut large to very large; 1¾ to 2⅛ ins. long; thin shell, very good quality, heavy bearer; excellent.

GRAPES

No part of the fruit garden yields a richer harvest than the vineyard. Along almost any garden fence or walk there is room for vines enough to furnish luscious grapes from July to November.

Well rooted vines---\$.60 Each; \$6.00 Dozen

Black Grapes

CONCORD. Large bunch and berry; one of the best and most popular old sorts.

FREDONIA. Improved Concord. Large bunches. Sweet.

Red Grapes

CACO. A new variety which is proving to be one of the best. It is wine-red with abundant bloom; the berries are very large; bunches medium in size, compact and of good form. Ripens almost with Concord.

White Grapes

NIAGARA. Bunch medium to large; berries large; skin thin with a whitish bloom; tender and sweet.

FRUIT TREES (Continued)**Muscadine Grapes**

Strong, 2-yr. plants-----\$1.50 Each

JAMES. Berries very large; blue-black in clumps of from 4 to 10; skin thin; pulp tough, sweet and juicy, quality very good. A showy variety.

SCUPPERNONG. Berries large; seldom more than 8 or 10 to a cluster; color brown, skin thick, flesh pulpy, very vinous, sweet, and of a peculiar musky aroma. We have grown this grape successfully in our Nurseries and find it free from disease and insect depredations and a fairly good bearer.

BLACKBERRY PLANTS

These require but little attention, producing good crops of fine berries. They are native to the Piedmont section, and will give excellent results with but little care except keeping the weeds and grass out, in addition to removing the old canes. No staking required.

ELDORADO. A strong, upright grower; large juicy berries.

Strong Plants \$2.50 Dozen; \$15.00 Per 100

RASPBERRIES

Raspberries will succeed in any good soil suitable for garden vegetables, and amply repay high culture. The best fertilizer is ground bone. Plant in rows 4 feet apart and plants 3 feet apart in the rows. Pinch tops out of young canes when 3 feet high, so they will branch and become stocky. Cut out all old wood which dies as soon as the fruit all ripens.

INDIAN SUMMER. Red.

CUMBERLAND. Black.

Strong Plants \$2.50 Dozen; \$15.00 Per 100

RHUBARB

LINNAEUS. Large, early, tender and fine. The very best of all Rhubarb.

Strong Roots ----- 40¢ Each; \$4.00 Dozen

ASPARAGUS ROOTS

MARTHA WASHINGTON. A new rust-resistant variety of great promise that is being planted largely in every asparagus section. The stalks are large, dark green, with a heavy purple overtone. The tips are tight and firm and do not open until well out of the ground.

2-yr., strong roots---\$1.00 doz.; \$6.00 per 100

MEMORANDUM

GUARANTEE—We will resupply one time, without cost, all plants purchased from us that die by June 1st, following planting. Plants that die the following summer will be resupplied, one time, at one-half price. The above guarantee does not cover planting in June, July and August, which is guaranteed for only 30 days.

All guarantees are predicated on the assurance by the purchaser that the plants have been properly cared for and that the plants have been paid for within 30 days of the date of planting.

Absolutely no claims for full replacements will be considered after June 1st following date of purchase.

Prices listed herein do not apply to specimen plants selected at the nursery. These will be priced individually according to value.

LOCATION—We are located 12 miles west of Richmond on U. S. 60, which goes through our nursery. Route 147 over the new Westham Bridge connects with U. S. Route 60 approximately 5 miles from our nursery and is the nearest route from the West End of Richmond.
